

## **Screencasting Using OBS**

### **Dr. Ritu Mago**

A **screencast** is a digital recording of computer screen output, also known as a **video screen capture** or a **screen recording**, often containing audio narration. The term *screencast* compares with the related term *screenshot*; whereas screenshot generates a single picture of a computer screen, a screencast is essentially a movie of the changes over time that a user sees on a computer screen, that can be enhanced with audio narration and captions.

OBS Studio is a free and open-source software suite for recording and live streaming. As of 2016, the software is now referred to as **OBS Studio**. There are versions of OBS Studio available for Microsoft Windows, macOS, and Linux Distributions. OBS is funded on Open Collective.

## **Screencasting Using Mobile Phone**

### **Ms. Shivani Sharma**

We can also record the screen of our Mobile Phones. There are lots of apps for mobile Screen Recording. We will discuss the A-Z Recorder app and will do hands-on practice on it.
