

## **Day 9 (04.08.2020)**

### **Creating Quizzes in Google Forms**

**(Dr. Seema Sareen)**

Google Forms is a fantastic tool for creating forms of all kinds, including quizzes, surveys, and questionnaires. A variety of question formats are available like short answer, paragraph, Multiple choice, checkboxes type etc. Forms allows you to watch responses appear in real time and then gather results in a spreadsheet and analyze data right in Google Sheets.

All you need to get started is a Google account. You can access the feature inside Google Drive. Just click the New button, then choose Form. From where you can select blank quiz template to create a quiz

In video 1 steps to add different formats of questions as well as images in the quiz are discussed

In video 2 customization of quiz, settings and how to send a quiz are discussed.

In video 3 Discussion regarding imposing a time limit to the quiz with the help of add-on “formlimiter” is done. We install an add on FormLimiter from add-ons in more menu

In video 4 writing mathematical equations and expressions is discussed. We can write mathematical equations with the help of chrome extension “EquatiO”, also an online equation Editor on the link [www.codecogs.com](http://www.codecogs.com) and a google forms add-on “Hypatia”

### **Testmoz: Online Test Generator Tool**

**(Ms. Shivani Sharma)**

Testmoz is a very quick and simple way to generate an online quiz for your students. The program has many options so you can customize the quiz and the responses your students will receive.

For the quiz you can:

- create 4 different types of questions: true/false, multiple choice, fill in the blank and select all that apply,
- decide how many options you have for each question,
- choose how much each question is worth (whole numbers only),
- set multiple correct answers for a fill in the blank question, and
- randomize the order of the questions and/or the choices.

This tool could be used in an online classroom especially as a formative assessment. This would utilize one of its biggest advantages – instant feedback. Link: <https://testmoz.com/>
