PRESENTS

**COURSE
STARTS FROM**

**25th
AUGUST
2020**

MASSIVE OPEN ONLINE COURSE ON DEVELOPING LOW COST EDUCATIONAL MATERIALS

ABOUT THE COURSE

This course is open to students/learners with no prior artmaking experience, it will also provide challenging alternatives for more advanced students—including the opportunity to design, create and execute their own art interventions in their teaching. The syllabus has been designed in lines of UNESCO's Asian Programme of Educational Innovation for Development of Low Cost Educational Materials for both trained educators/ facilitators and true beginners in mind.

Most often educators/facilitators have difficulty in delivering adequate learning material for the education outlet. And because of this learning objectives are often not met. As a result there is poor realization of educational goal, and objectives go largely unmet. There are different factors behind this. These include low budget allocation for production and distribution, poor monitoring mechanism, and weak commitment towards the learning objectives on the part of educators/facilitators. It is a compounded problem. Even if there is intention the limitations are also there.

An educator/facilitator must possess the skills to develop learning material and the talent to express feelings through song, the spoken word or symbolic visual forms. A good educator/facilitator can always use such talent as a resource for devising learning material that suits their students or learning community. The course elaborates on a few tips for using different forms of possible communication format to facilitate learning in the class rooms.

**TIME
COMMITMENT
4
WEEKS**

LEARNING OUTCOMES

Understanding of low-cost educational materials

Developing some low-cost educational materials

Using low-cost educational materials in classrooms
